27th May 2020.

Dear Commissioner,

My enclosed book – [Redacted] – looks at “the big picture” that include the impact of politics on the Natural Environment. Balboa Press talked me into self-publishing to co-inside with the devastating bushfires and drought and radical climate elsewhere in the world.

I am 77 and survive on a Pension. My bank-account had only just reached double-figure thousands after years of rent-free, house-sitting. Balboa Press led me to believe that the cost was going to be just over \$6,000 but the level of deceit that followed was dreadful and dragged out the cost to just over \$14,000. That left me in debt – for the first time in my life. However, I gambled on “the timing aspect” but that was shattered by the onslaught of the Covid-19 epidemic. Despite sending out 50-copies, none in the media has even commented.

We must change. The ingrained Culture of Politics – based on “self-interest, expediency and quick-fix” is a focus on money, the escalation of private enterprise and to feed it – population explosion. There is no regard for “balance.” To make matters far worse, the bureaucratic system worships “band-aide application” when we know that such a policy assists and stimulates corrosion. This is why standards fall, why the quality of social education declines with each generation and why the growth of selfishness and corruption escalates.

To add further to our demise – we have a hard-core, legal system NOT a justice system. The legal system is loaded with insufficiencies, inconsistencies and technicalities – frequently manipulated to satisfy injustice. The legal system is nothing but a superficial interference to the cycle of crime and misconduct. People offend, they are given a punishment and when it is satisfied – they are free to re-join the damaging cycle. No one wins. So, the three systems – political, bureaucratic and legal – cannot achieve solution, correction or prevention.

We must change now – before things get so bad that change becomes virtually impossible. We must understand that the current Virus epidemic is only “a tap-on-the-shoulder” compared to what Mother Nature will do to us – when “she” retaliates against the constant political abuse of it. Please support my book and share it with others. It is a focus on how to solve the mess.

[Redacted]

“When in doubt – ask a woman.”

THE NEW HORIZON CAMPAIGN. THINGS THAT WE MUST CHANGE.

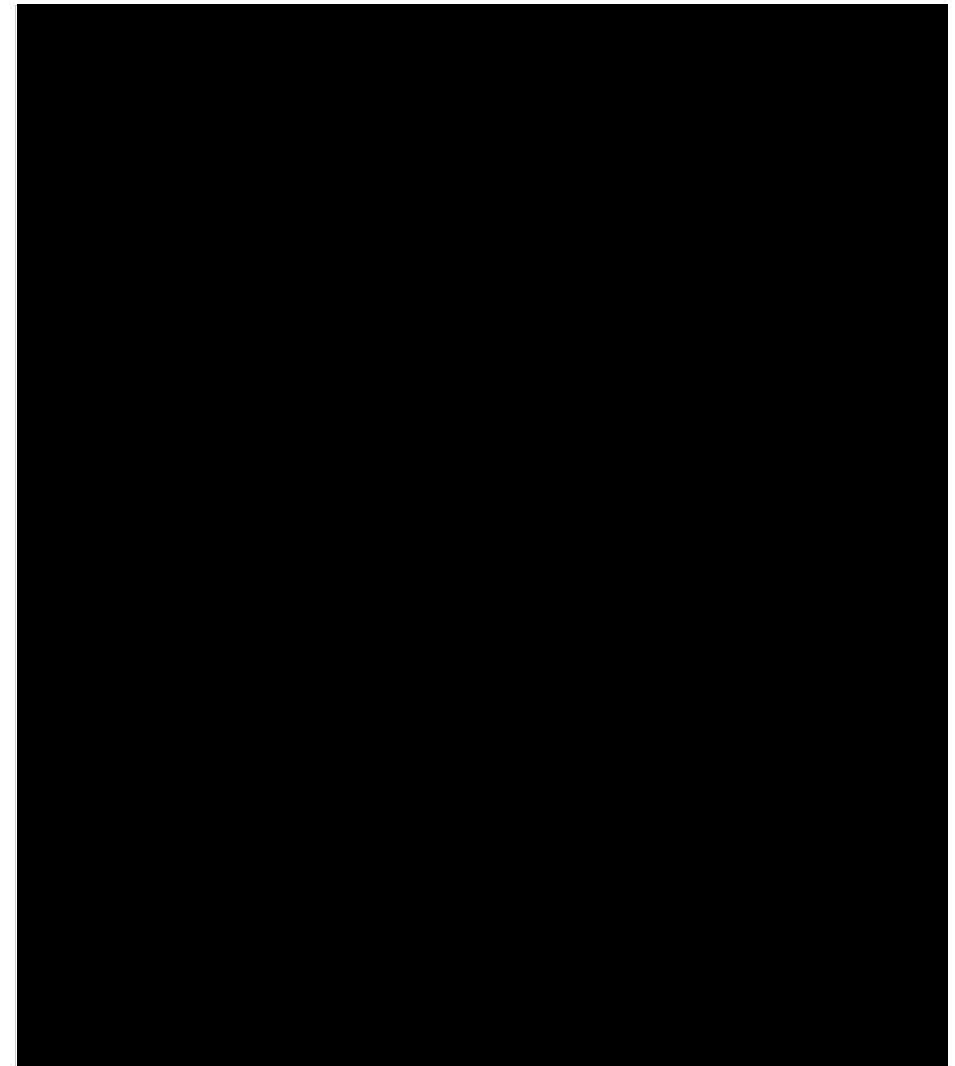

- End the destructive Culture of Politics.
- Make “balance” essential in decision-making.
- Stop impacting on the natural environment.
- End the corrupt, “band-aide application” policy.
- Redesign the legal system to a Justice System.
- Vastly raise the standard of social education.
- Diminish domestic violence & abuse.
- Give ALL children a better quality-of-life.
- Raise up from the gutter – Child Rights.

Stop complaining and seriously revive
“the power of democracy.”

Change must happen now.

If we allow things to get worse –
a better future may be impossible.

Type into Google – 

Read the book. It describes the “how & why” of our
mess and how to create a better future for our kids.

Order a book on-line.
